PROFESSIONAL SUMMARY

Self-taught and highly motivated MERN Stack Developer with a solid understanding of backend and frontend development. Built multiple full-stack applications, user management systems, and RESTful APIs. Strong in React.js, Node.js, MongoDB, and TypeScript. Passionate about delivering clean, maintainable code and solving real-world problems.

PROJECTS

E-Commerce Website (WristStyle)

[GitHub Link](#)

Built a complete e-commerce platform using Node.js, Express.js, and EJS.

- Features user authentication, product listing, cart functionality, and admin management.
- Used MongoDB for database, EJS for templating, and implemented session-based authentication.

User Management System

[GitHub Link](#)

Developed a React + TypeScript-based dashboard for managing users.

- CRUD operations with real-time updates using Axios and JWT for authentication.
- Fully validated form inputs and responsive layout.
